

# **“WHO ARE THE GREENIES”**

**People of Victorian are entitled to know the background of these people who are having such an important impact on all Victorians at large and on the bushmen in particular.**

One fact that is abundantly clear to me and to other real bushmen is that very few of the greenie element live in the bush, even fewer work in the bush except in government jobs.

Cattlemen will be kicked out of the high plains on the say so of these inexperienced few.

Canine tracking sportsman will be denied access on the say so of the conservationist minority.

Small businesses across Victoria will be devastated by the greenie movement. Shops, sports, stores, abbatoirs, cattle transport, ammunition

suppliers — thousands of jobs will be at risk on the say so of the inexperienced school teacher type conservationist lobby.

Politicians hedge in on this vote catching area. Channel 10 highlighted the ignorance of Democrat Candidate Michael Nardella when he and a Tasmanian politician were seen sampling our famous upside down Yarra water.

This river is always dirty, even before white men arrived the Yarra was dirty in winter.

Our Yarra flows through clay producing basalt areas, mud is always evident in this river, it is not a sand based river, yet they had the audacity to blame the upstream cattlemen for its discolouration.
